WHO ARE WE?

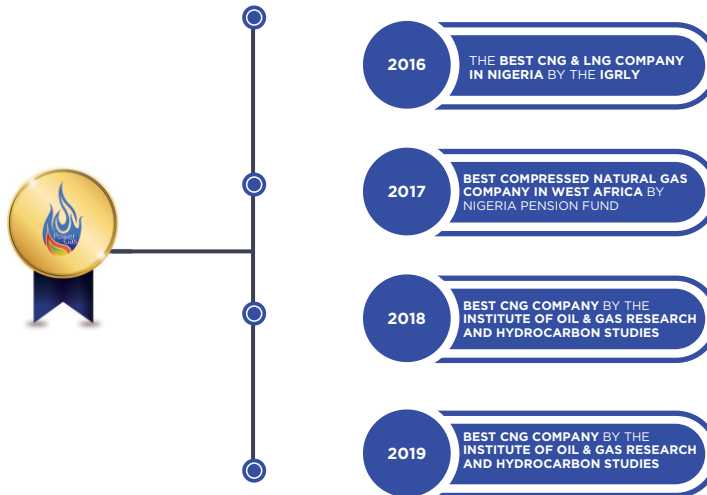

Powergas is Africa's largest compressed natural gas (CNG) producer and distributor and a pioneer in "virtual pipeline" gas distribution, providing CNG to clients where gas connectivity is unavailable.

Powergas was founded to address the severe energy and electricity challenges in Nigeria, which is plagued with a limited gas pipeline infrastructure, unreliable grid power & high costs of imported alternative fuels.

Powergas' clean and competitive 'virtual pipeline' offering is a win-win' for the African market - providing a viable replacement for expensive, environmentally polluting diesel.

Powergas operations are predominantly in Nigeria, both Africa's largest economy and natural gas producer.

Powergas has proudly held a 100% positive safety record while conducting over 70,000 CNG deliveries

VIRTUAL GAS SUPPLY CHAIN

Powergas sources raw natural gas from renowned downstream producers with strict composition quality standards. The gas is then further treated and processed through our unique processing solution removing condensates to achieve high calorific value. Lastly, the treated gas is compressed & filled into specialized high-pressure gas cylinders (CNS) which are used for final delivery to our customers.

Powergas services are aligned with the Federal Government of Nigeria's efforts to increase domestic natural gas utilization and achieve the "Zero fare Policy". Both the private sector and governments across Africa are shifting focus from polluting important energy sources such as diesel and HFD towards domestic natural gas with an established track record as the preferential supplier of CNG to industries in Africa, we are poised for an exciting growth period.

GEOGRAPHICAL PRESENCE

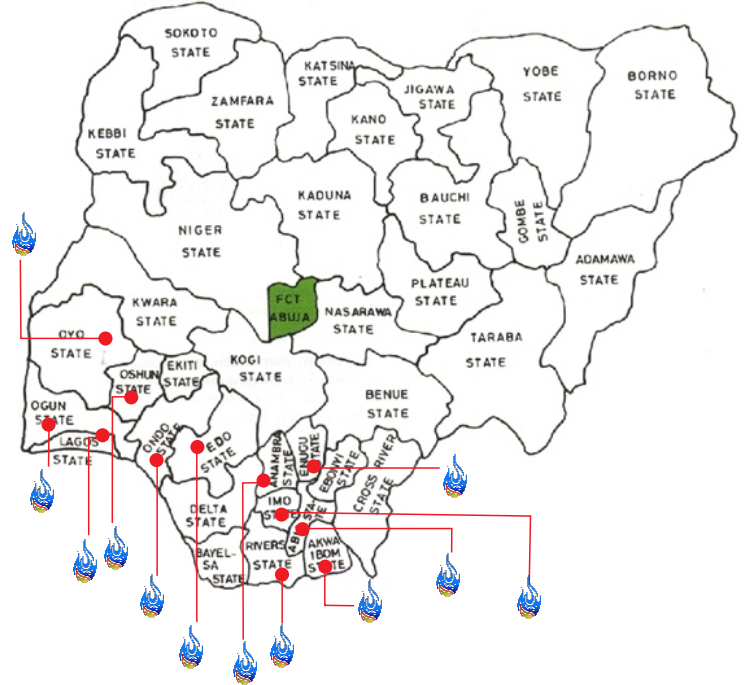

Current PG compressing plant locations

Powergas currently operates five compressed natural gas (CNG) plants across Nigeria-strategically located to service Southern Eastern & Western industrial clusters.

Moreover, our plants have diversified natural gas suppliers, hence our CNG ability is the most reliable in Nigeria. Even if one supplier has a disruption, we can deliver CNG to our clients delivering on commitments & less customer downtime.

Powergas has built additional CNG plant facilities in Delta State, which has over 400,000 SCM per day capacity.

Current PG client present locations

Power Gas has established a presence in over 10 states across the country. Our customized solutions meet the specific energy needs of each customer and support economic growth.

We offer compressed natural gas.

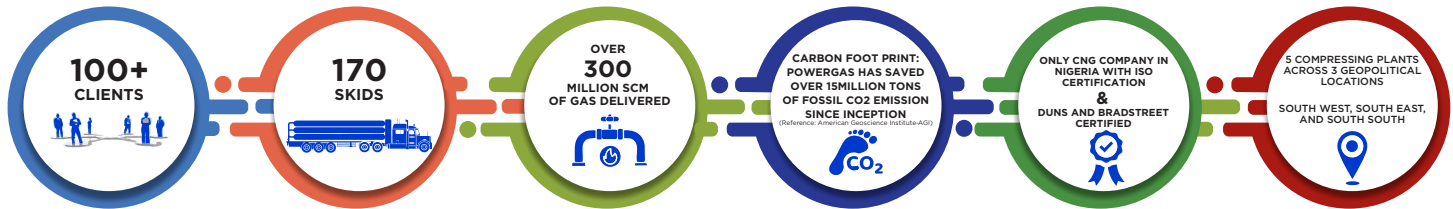

Our team is dedicated to providing exceptional customer service and support. We remain committed to our core values of integrity, excellence, and innovation, building strong partnerships with local communities to create a sustainable future.

MILESTONES

We are proud to announce that Power Gas has reached a significant milestone since its inception. Through our commitment to innovation and excellence, we have achieved tremendous success in the energy sector, delivering reliable and affordable solutions to our customers across the country.

Our success is reflected in the attached infographics, which demonstrate the growth and impact of our company over the years. From our humble beginnings to our current position as a leader in the industry, we have remained focused on our mission of providing sustainable energy solutions that meet the evolving needs of our customers.

We would like to extend our sincerest thanks to our customers, partners, and employees who have contributed to our success thus far. As we look to the future, we remain committed to building on this foundation of excellence and continuing to innovate and deliver the highest quality products and services to our customers.
